I am a self-motivated backend software engineer with over 6 years of experience who is well-versed in RESTful APIs with microservices architecture. I designed highly scalable backend systems that scaled to millions of users for my company.

RELEVANT WORK EXPERIENCE

Senior Backend Engineer @ SchoolDesk

Sept 2017 - Present | Accra, Ghana

- ▶ Built the entire backend for a startup (SchoolDesk), with a team of other engineers, using Python & Flask framework.
- ▶ Works with a variety of languages, frameworks and platforms such as Javascript, Python, Flask, Node and Google Cloud Platform.
- ▶ Split an initially monolith backend into decoupled *microservices* that serve different aspects of the system, including mobile apps.
- ▶ Write high quality, documented and maintainable code using SOLID principles for quick/easier on-boarding on the backend team.
- ▶ Set up CI/CD with Gitlab for quick and safe deployments.

Onsite IT Support @ Schlumberger

Sept 2017 - April 2018 | Takoradi, Ghana

- ▶ Provide IT support to employees of Schlumberger via HelpDesk.
- ▶ Deployed and managed network systems, ensuring close to 100% uptime throughout the period.
- ▶ Interact with the members of IT support team in other locations, leveraging office collaborating tools like MS Teams, MS Planner and Skype for Business

Backend Developer @ ASQII

Jan - Oct 2017 | Remote

- ▶ Design structure for backend of several in-house and clients applications.
- ▶ Implemented systems mainly using Python Django, hosted on AWS.
- ▶ Collaborate with other remote team members using tools like Slack, Trello.

Android Developer @ ASQII

May - Dec 2016 | Remote

- ▶ Development of native apps for the android platform using Java.
- ▶ Reduced battery usage of existing apps by ~35%, by leveraging Google's recommended development patterns for android platform.
- ▶ Redesign existing app using *Material Design* principles.
- ▶ Built apps that integrates with Firebase Realtime Database and takes advantage of other *serverless* features such as Firebase Authentication for Social Auth (Facebook, Twitter) and Firebase Cloud Messaging.

System/Database Administrator @ OWASS Basic School

May 2015 - June 2017 | Kumasi, Ghana

- ▶ Developed an on-premise Windows desktop application for managing students records stored in MS SQL Server database.
- ▶ Leverage Visual C# to design custom UI components for school.
- ▶ Implemented a service in C#.NET which periodically creates and uploads data backups to an online server application hosted on Heroku.
- ▶ Reduced institution's expenses by ~1.3% through digitisation.

Volunteer Trainer @ Ghana Robotics Academy Foundation

June 2014 - June 2018 | Kumasi, Ghana

- ▶ Trained high school students in robotics and other STEM fields.

SKILLS

Programming Languages

Python, Javascript

Java, Golang, C#, VB, C/C++

Libraries & Frameworks

Flask, Node.JS, Express.JS, Apollo/GraphQL

Django, DRF, .NET, React

Data

MySQL, MongoDB, MS SQL Server

PostgreSQL, GraphQL, Elasticsearch

Tools & Platforms

Git, Docker, AWS, GCP, Heroku, Agile/

Scrum, Gtk, RabbitMQ, TDD

EDUCATION

Kwame Nkrumah University of Science and Technology

2013-2017 | Kumasi, Ghana

Bachelor of Science in Computer Engineering.

Majors in Software Engineering.

Courses: Data Structures & Algorithms, VLSI, Computer Architecture, Robotics, Distributed Systems Design, Object Oriented Programming, Computer Graphics, Statistics & Probability.

PROJECTS

gae-env

github.com/Odame/gae-env

A python package that allows for secure storage of environment variables in Cloud Datastore for Google Appengine projects.

loggabat

github.com/jaxtisapia/Loggabat

Javascript logger for filtering logs you need in production, from logs you need in development mode only.

Robotic Lawn Mower

A lawn mower that can operate autonomously to clear a predefined piece of lawn. Written in C/C++

INTERESTS

Robotics, STEM Education, AI/ML
